

Gangways & Marine Elevators

ELIGROUP
naval service network

Eligroup is your trusted partner for gangways and marine elevators on board your cruise and ferry vessels

UNIQUE CONCEPT

We are highly specialized in supply and installation and maintenance of lifts, vertical mobility systems and lifting platforms. Our team of experts is at your disposal for any request and we are confident that our expertise will satisfy your expectations. In order to deliver successful turnkey projects, ELIGROUP controls every aspect, from top to bottom, of the design, manufacture, installation, training, operation, maintenance, refurbishment and spare-parts distribution for its complete range of solutions. This unique, fully integrated approach makes ELIGROUP a global partner which not only has the know-how, the experience and the resources to supply on-time, high quality, efficient and reliable passengers boarding bridges and gangways, but also enables cruise lines, ferry lines and terminal operators to provide passengers with a superior boarding experience, reduce operational costs and enhance logistic flows.

SMART & SAFE

Our service technicians are certified for offshore operations and provide support to classification societies like DNV GL, Lloyd's Register, Bureau Veritas etc. when conducting initial tests and periodic examinations.

Thanks to the great experience gained in years of activity we are certain to propose and ensure the right solution for your needs.

VERSATILITY

Our team is at your disposal from the first interaction until the issuance of the service certificate, supporting you at every stage of the process. The global presence of our expert technicians ensures we provide immediate response and action anywhere in the world.

VERSATILITY FOR CRUISE & FERRY SHIPS

Our SPBBs include electro-mechanical and hydraulic drive and elevation technologies. They can be defined to serve a large variety of Ferry and Cruise ships, including those with overhanging lifeboats, and to overcome many challenges faced by passenger terminal operators

UNIQUELY DESIGNED

Each Ferry and Cruise Terminal is unique and therefore each facility requires specific logistical and operational solutions that best fits its particular needs. ELIGROUP SPBBs are totally custom-designed by an expert team of engineers who take multiple variables in consideration during the design

CUTTING-EDGE TECHNOLOGY

ELIGROUP's SPBBs incorporate the most advanced elevation and drive technologies, state-of-the-art automation and direct access design for easy maintenance

MAXIMUM COMFORT & EASY ACCESS FOR ALL

We strongly believe that from the moment passengers enter our SPBB, they begin their journey. All our SPBBs enable step-free access with limited slopes, thus ensuring that the highest level of comfort is enjoyed by all passengers, including those with reduced mobility.

INTEGRAL SAFETY SYSTEM

ELIGROUP SPBBs provide total safety for people (passengers and operators) and structures (ships and terminal buildings) and comply with up-to-date worldwide safety & security standards.

SUPERIOR QUALITY DURABILITY

All our Seaport Passenger Boarding Bridges are designed for an operational lifespan of 20 to 30 years. All materials and components are rigorously tested and certified according to European and International standards.

We maintain your equipment, whatever the make.
Your building has escalators, elevators or moving walks from different suppliers. We can take care of them. With our network of experts around the world, we will find a solution to keep your equipment running.

ESCALATORS FOR CRUISE SHIPS

Eligroup specializes in escalator systems for cruise ships. All systems are designed to facilitate the boarding and disembarkation process and to make operations easier by also taking into account aspects of energy efficiency.

We do not offer standard off-the-shelf products. Working together with world wide manufacturers, we consider each aspect of the required look and functionality to produce a design sketch for our customer's approval or suggestions.

Once the completed design is approved by our customer, we obtain class society approval (DNV, ABS, LR, GL, BV, RINA, NK and KR) to assure you of compliance with all applicable regulations and standards.

Experts in the maintenance, upgrading and installation of lifts and elevation systems. We are able to maintain any brand of lift thanks to the continuous training of our technical team.

Fast, efficient and high-quality service thanks to the use of new technologies and our technical team's capillarity. We offer personalized advice on all types of projects: accessibility, energy efficiency improvements, installation of lifts in properties without them, new construction, replacement and upgrading of lifts. Any mobility solution, any brand.
